PPG Canada Inc. and Summit Software Solutions Announce a New Partnership

MISSISSAUGA, Ontario, March 7, 2008 – PPG Canada Inc. and Summit Software Solutions are pleased to announce their new preferred vendor partnership. The partnership gives the PPG *CertifiedFirst* network of collision repair centres access to the complete line of Summit products and services.

“From our customers who are already using the Summit software we’ve had great feedback,” says Jeffery Murphy, Marketing Programs Manager. “Summit’s systems allow collision repair centre owners and managers to track almost anything. Their digi-lean technology is in line with our Throughput Performance Solutions, making this a great fit.”

Summit offers digital performance management systems (Ascent™, RPM™, VantagePoint™, Summit™ and the Digital Performance System™) to meet the needs of any collision repair centre by offering a complete customer management software solution from invoicing to scheduling to communications. Their systems are available for both single store and multi store locations.

“My Summit management system makes my job easy. It allows me to manage the business more effectively. I don’t know how someone could run a shop without Summit,” explains Alec Smales, owner, South Barrie Collision Centre.

The preferred vendor partnership will be in effect from February 1, 2008 until further notice.
